The 'Label' field is populated with 'Account', the 'Plural Label' with 'Accounts', and the 'Object Name' with 'Account'. The 'Description' field is currently empty. Below this, the 'Enter Record Name Label and Format' section shows 'Record Name' as 'Account Name' and 'Data Type' as 'Text'. At the bottom, the 'Optional Features' section has 'Allow Reports' checked and 'Allow Activities' unchecked. A yellow banner at the top of the form area states: 'Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles. [Tell me more](#) [Don't show this message again](#)'.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app.
